

Artificial Intelligence and the Law

RECORDED ACCESS ONLY

In this practical webinar, you will learn about the latest developments in Artificial Intelligence and get a glimpse into the future, as additional legal tasks get automated.

Upon course completion, you will be able to:

- Define “machine learning”
- Describe how machine learning is already being used by law firms
- Evaluate how Artificial Intelligence is changing legal jobs
- Consider the ethical implications of Artificial Intelligence decision-making models

AREAS COVERED IN THIS WEBINAR

- What is Artificial Intelligence?
- Machine Learning / Deep Learning
- AI Usage Today – Some real examples
- What's Coming?
- AI Legal Issues
- Discrimination
- Privacy
- Regulation
- Product Liability
- Law Enforcement

WHY SHOULD YOU ATTEND

Artificial Intelligence is changing many markets, including the legal market. Find out what is happening in this.

INSTRUCTOR PROFILE

Mark Henriques has litigated contract cases for 27 years and brings a practical, litigation-oriented approach to drafting and negotiating contracts. Mark is a partner with Womble Bond Dickinson, a transatlantic firm with over 1000 attorneys, where he has practiced since 1991. Mark is a skilled trial lawyer who has successfully handled and tried cases in a variety of contexts ranging from breach of contract to class actions. He has experience in state and federal court in both North and South Carolina. Mark has successfully handled numerous trials, arbitrations, and mediations. Mark has served as the first chair in more than eight jury trials, five of which lasted a week or more. He has successfully argued cases before the Fourth Circuit Court of Appeals and the North Carolina Court of Appeals. His areas of focus include technology, construction, manufacturing, and real estate disputes.
